Explanatory Note: MPD Cobalt/Data warehouse data queried on 09/11/2019. All statistics presented here are based on preliminary DC Index crime data and include Homicide, Sex Abuse, Robbery, Assault with a Deadly Weapon, Arson, Burglary, Stolen Auto, Theft, and Theft from Auto.

The data do not represent official statistics submitted to the FBI under the Uniform Crime Reporting program (UCR). All preliminary offenses are coded based on DC criminal code and not the FBI offense classifications. All statistics are subject to change due to a variety of reasons, such as a change in classification, the determination that certain offense reports were unfounded, or late reporting. Please understand that any comparisons between MPD preliminary data as published here and the official crime statistics published by the FBI under the Uniform Crime Reporting Program (UCR) are inaccurate and misleading.

Please note that changes to MPD's PSA and District boundaries occasionally occur. The statistics above are based on current police boundaries as of January 10, 2019. **For the purposes of Clery Act Data Requests, reports include all crimes that occurred on the campus as well as across the street up to 200 feet. If a college or university only occupies one building or one floor within a building, data for the entire block will be provided with exact addresses. This is also true for hotels or locations hosting conventions, seminars, meetings, trainings, internships, sporting events, etc. Excludes crimes for which no location could be identified (between 1 and 3% of all crimes)**
